

Siliconization of injection cylinders by using *microjet*[®] rotator-360

Internal and external lubrication of

- injection cylinders
- injection cannulas with housing
- needle bearings
- pipes and much more

- clean
- efficient
- sustainable
- precise
- minimal application quantities of liquid media
- full-surface or sectorial lubricating zones

Benefits of the *microjet*[®] system technology

- nozzle variations for smallest installation spaces
- reproducible application quantities
- improved production quality
- high productivity
- clean working area
