

microjet® oil application systems

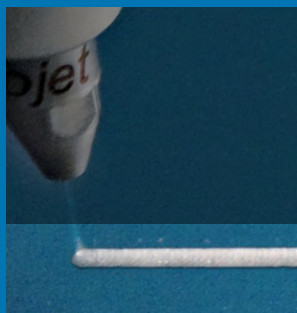

Punctual application

- ▣ Different application sizes
- ▣ Most varied quantities applied
- ▣ Very short cycle times

Spraying application

- ▣ Various spraying widths and quantities applied
- ▣ Spraying of flat surfaces, bores, pipes (inside and outside), grooves, etc.

Pass application

- ▣ Different quantities applied
- ▣ Various contours

Benefits

- ▣ Uniform reproducible quantities applied
- ▣ Lubrication of the most varied superficial shapes
- ▣ Material and time saving compared with manual and contact application
- ▣ Integration in automated production lines
- ▣ Clean workplace and working environment
- ▣ High efficiency

microjet® oil application systems designed for the automotive, electrical, aeronautical and food industry

microjet®
